Yale

Yale Standard Security Combination Cable Lock

For peace of mind, protect your bike with Yale.

Whether you're an occasional rider or you like to bike to the shops, the Yale Standard Security Cable Lock is a lightweight, versatile and convenient standard security solution.

Features:

- Steel ball combo gear system resists picking & pulling
- Double rubber and vinyl protective coatings protect bike's finish & lock's internals from impact
- Tough vinyl cable coating
- Integrated phosphorescent 4 digit resettable lock
- 2 year guarantee

Convenient and secure solution

This keyless cable lock resists picking & pulling with its steel ball combination gear system.

Easy to carry around

This lightweight self-coiling bike lock can be easily stored with the supplied velcro straps.

Lock it anywhere

Conveniently lock your bike's wheels, frame and forks with the extra flexible cable and easily enter the code in the dark thanks to the phosphorescent digits.

Protective coatings

The bike lock's double rubber bumper and tough vinyl coatings protects the interior from bumps and the bike's paint and surface from scratches.
